DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 5-11 been renumbered 7-13.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8-9 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 the limitation "at an acute angle the end face and formed..." is unclear.

Claim 9 recites the limitation "the face" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "connected to the means" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3721

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hannen (US 4,651,508).

Hannen discloses an apparatus for shrink wrapping a foil wrapped about a stack of objects comprising a frame; vertically displaceable heater 14; nozzle 17; and means 16 for supplying gas under pressure; see figure 1.

Hannen does not directly disclose nozzle 17 as vertically centered on the stack nor movable, however it would have been obvious to one of ordinary skill in the art to adjust the position of the nozzle because it has been held that making an old device portable or movable without producing any new and unexpected result involves only routine skill in the art. *In re Lindberg*, 93 USPQ 23 (CCPA 1952).

6. Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hannen (US 4,651,508) in view of Hannen (US 4,616,471).

Hannen '508 does not disclose a second nozzle directed to the lower end, nor a lift table and pressing means, however Hannen '471 teaches a shrink wrapping apparatus comprising nozzle/blower 20 at the lower end; lift table 16 and pressing means/conveyor 13a (when pallet is lowered after heating; see column 3, lines 18-24).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
